DETAILED ACTION

Response to Amendment

1. The PRELIMINARY AMENDMENT filed 12/14/01 for the claims number 5-10 is not considered. The reason is that the claims received in the AMENDMENT do not match with the claims in the application. The examiner believes that they are not correctly amended. So, the examiner is using the original claim for examination purpose.

Foreign Priority Paper

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in UK on 06/25/1999. It is noted, however, that applicant has not filed a certified copy of the 9914858 application as required by 35 U.S.C. 119(b). The filed priority paper does not match with the contents of the application subject matter.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the **claims**. Therefore, the claims must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) Or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(f) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(g) BRIEF SUMMARY OF THE INVENTION.

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Applicant's are advised to provide proper headings following the above format.

Claim Objections

5. Claims 6 through 9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim 6 through 9 not been further treated on the merits.

Claim Rejections - 35 USC § 112

6. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Allowable Subject Matter

7. Claim 1 through 5 are allowed.
8. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references in the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, specifically the step of "applying a set of rules to the training code such that the Chanalization code is known" when the training code is detected.

Regarding claims 2, 3, 4 and 5 are allowable for the reasons give in claim1 because of their dependency status from claim1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Pertinent Art

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - 1). U.S. Patent Document 6,108,369 discloses channelization code allocation for radio communication system.
 - 2). U.S. Patent Document 6,163,524 discloses about channelization code allocation and re-allocation in CDMA.
 - 3). U.S. Patent Document 6,693,952 discloses about dynamic code allocation for radio downlink shared channel.
 - 4). U.S. Patent Document 6,560,194 discloses about method of allocating orthogonal code in a code division multiple access mobile radio system using codes of variable length.
